**ISG TECHNOLOGY INC. Achieves  
Cisco SMB Select Partner Status in the US**

**Columbia, MO – June 28, 2006** – ISG TECHNOLOGY INC. announced today that it has achieved the small and medium-sized business (SMB) Select Partner designation from Cisco Systems®. This recognition is awarded by Cisco to organizations that meet specific program criteria that is focused on business practices in the small and medium-sized business (SMB) marketplace (companies that have between 20-250 employees).

ISG TECHNOLOGY INC. has met the rigorous Cisco certified personnel levels that are required of an SMB Select Partner to ensure that sales and support organizations are properly staffed and are capable of selling, designing, installing, and supporting products for the SMB marketplace. ISG is a dedicated local company that understands how to design and deliver a secure, reliable network infrastructure. As Cisco's go-to-market channel in the SMB segment, ISG understands what drives and challenges companies with fewer than 250 employees.

This outstanding accomplishment for ISG TECHNOLOGY INC. demonstrates its desire to develop expertise in complex networking technologies. ISG is a valued member of Cisco's channel partner program. This new designation sets ISG TECHNOLOGY INC. apart from other vendors who may not fully understand the business concerns of companies in the SMB marketplace. Cisco provides ISG with the training, support, and resources necessary to provide the highest quality of services available to their SMB customers. For more information about ISG TECHNOLOGY INC., please visit [www.isgtech.com](http://www.isgtech.com) or call (785) 823-1555.
